

Dohee Hahn

Director Division of Nuclear Power Department of Nuclear Energy. IAEA

Mr Dohee Hahn is currently Director of Nuclear Power Division within Department of Nuclear Energy at the International Atomic Energy Agency (IAEA).

Mr Hahn has over 30 years of experience in the nuclear field. Before joining the IAEA in 2015, he was Vice President for Advanced Nuclear Energy Systems at the Korea Atomic Energy Research Institute (KAERI) and led national research and development programmes in the areas of fast reactors, very high temperature reactors and related fuel cycles. He also participated in high-level strategic planning and management of the institute.

After starting working for KAERI in 1990 as a principal researcher on fast reactor safety, Mr Hahn held various positions in the area of advanced reactor technology development, including Division Director for sodium-cooled fast reactor technology, and Vice President for Reactor System Technologies.

He served on numerous national and international committees on advanced nuclear systems, including the Generation IV International Forum as the Technical Director.
